FSA[®] FAST SEALING ADDITIVE

- Stops tracking • Improves sand dispersion
- Use with all sealers • Dries Fast

The original fast sealing additive from Maintenance, Inc. Improves gas & oil resistance, stops tracking, and dries fast while enhancing the flexibility of the sealer film. FSA improves sand dispersion while reducing curing time by 50% or more. **Use With: Asphalt Emulsion Sealers, or Blends.**

Suggested Formula Range:

PAVEMENT SEALER — 100 Gals. WATER — 10 to 35 Gals. PAVEMENT SEALER — 100 Gals.
FSA ADDITIVE — 2 to 5 Gals. SAND — 300 to 500 Lbs. FSA ADDITIVE — 7 to 10 Gals.

Cold Weather Formula Range

PAVEMENT SEALER — 100 Gals. WATER — 10 to 30 Gals.
SAND — 300 to 500 Lbs.

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE
3FSA5	5 Gal. Pail	48 lbs.	\$75.95/pail
3FSA55	55 Gal. Fiber Drum	525 lbs.	795.00/dr.

FASS-DRI[™] PAVEMENT SEALER ADDITIVE

FASS-DRI Pavement Sealer Additive is the result of an exciting break-through in additive chemistry. It enables you to **open parking lots to traffic in as little as 30 minutes**. Jobs can be completed faster – lots can be striped quicker for reduced down times.

Packaging: In convenient **easy-to-handle 2-gallon pails**, or conventional 5-gallon pails.

Suggested Formula Range: Add 2 gallons of Fass-Dri PSA to 100-150 gallons of concentrated sealer. Add water and sand per manufacturer’s recommendation.

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE
3FDPSA2	2 Gal. Pail (48 per skid)	28 lbs.	\$51.95/ea.
3FDPSA5	5 Gal. Pail (36 per skid)	70 lbs.	130.00/ea.

Suggested Formula Range:

PAVEMENT SEALER — 100 Gals. WATER — 10 to 35 Gals.
FASS DRI PSA — 2 to 5 Gals. SAND — 300 to 500 Lbs.

- The latest advancement in fast dry technology for the fastest drying times.
- Fortified with SSA (Sand Suspension Additive) for Dual Action performance... fast cure and sand suspension.
- The blackest color – The toughest film.
- Ideal for asphalt emulsion or blended sealers.

Suggested Night Time Range:

PAVEMENT SEALER — 100 Gals. WATER — 10 to 30 Gals.
FASS DRI PSA — 7 to 10 Gals. SAND — 300 to 500 Lbs.

Superior sand suspension for uniform applications, **added resistance to gasoline, fuels, and oils, rubberizes sealer for increased scuff resistance and reduced power steering marks,** and **speeds up drying time of the sealer.**

Suggested Formula Range: Add 2 to 4 gallons of TARGEL PLUS to 100 gallons of concentrated pavement sealer. Add water and sand per manufacturers recommendations. (NOTE: Always dilute TARGEL PLUS 1:1 with water prior to addition to mix.)

- Meets FAA Specs for pavement sealer additives.
- Fortified with fast drying additive.

Multi-Dimensional additive that greatly enhances the overall performance of coal tar emulsions, asphalt emulsions, or blended pavement sealer products. Does thicken asphalt based and blended sealers.

ASPHALT COATINGS

FASS-DRI™

ASPHALT RESURFACER

- Dries so fast, it is ready for traffic in as little as 30 minutes
- Geotextile fortified to be tough
- Long lasting protection
- Slip resistant
- No tracking

Sprayable*
Can be applied with
conventional sealer
spray equipment

Application: FASS-DRI Asphalt Resurfacer is available in a ready-to-use, pre-mixed form or as a two component system. The two component system consists of a liquid that requires the addition of a precise proportion of special silica sand. The liquid can be purchased with or without this sand.

***Spray Applications:** For best performance, hose length should not exceed 100 ft. (from pump to spray wand), and use an 80/50 ceramic spray tip.

Coverage: 80-100 sq. ft. per gallon per coat (2 coats recommended).

FASS-DRI Resurfacer is used on many major motor racing tracks nationwide.

Asphalt resurfacing without 12 to 24 hours of downtime means minimal loss of business to your customer and lets you, the contractor, turn nuisance work into quick, highly profitable jobs. This non-tracking, rich slate black finish offers long lasting protection from temperature change, stress, abrasion and chemicals. FASS-DRI is reinforced with geotextile fibers for increased flexibility and tensile strength. Resurface existing asphalt pavement with the only asphalt coating that is classified by Underwriters Laboratories for slip resistance. FASS-DRI is the preferred product for service stations, fast food restaurants, convenience stores, banks, hospitals, golf courses, motor sports tracks, airport taxiways, etc.

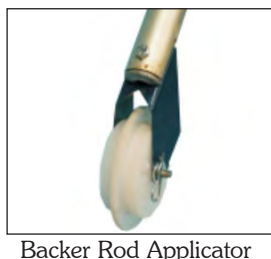

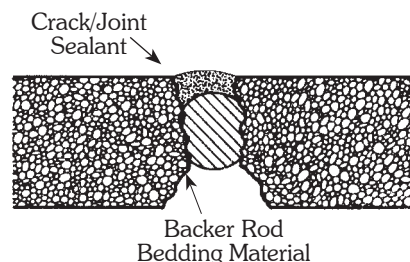

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE

3FDAE5	Ready to Use 5 Gal. Pail	65 lbs.	35.00

BACKER ROD

JOINT SEALANT BEDDING & BACKUP MATERIAL

- Unique filler/bed for deep cracks or joints
- Compatible with hot or cold applied sealant
- Stops waste of costly sealant material

A unique, round, continuous-length, compressible foam material that helps ensure proper performance of the sealing system. It has an open cell structure that allows air flow to speed sealant drying and curing from both the top and bottom. Being hydrophobic, it will not wick water. BACKER ROD can be used with hot or cold applied sealant material.

Application: Recommended size per crack/joint width:

BACKER ROD Diameter	3/8"	5/8"	7/8"	1-1/8"	1-1/2"	2"
Crack/Joint Width	1/4"	1/2"	3/4"	1"	1-1/4"	1-1/2"

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE

Advanced Formula J-16[®] Driveway Sealer

READY-TO-USE

- **A ready-to-use version of the original contractor grade Advanced Formula J-16[®] Pavement Sealer**
- **The best choice to protect and beautify your asphalt parking lots and driveways**

Also available in Asphalt based J-16 AE RTU

Application: Use hand squeegees or brush applicators. Brush applicators are best on extremely smooth or rough open-textured surfaces. A previously unsealed driveway or one in marginal condition may require 2 coats of J-16 DRIVEWAY SEALER.

J-16 DRIVEWAY SEALER is available in two (2) grades — Plain (no sand) and Sand-Filled. Use Sand-Filled on the first coat over new asphalt, on moderate to heavy traffic areas for extra wear or on areas where extra traction and slip resistance are needed.

Beware of inexpensive, watered-down, discount store sealers. The best looking, longest lasting off-street asphalt pavements are protected with ADVANCED FORMULA J-16 DRIVEWAY SEALER. Unlike most sealers, it keeps natural elements, de-icing salts and automobile deposits from penetrating asphalt. Gas and oil can't eat it away. The sun can't dry it out. Winter moisture can't seep in, freeze and rip it apart. And summer rain can't erode the foundation. ADVANCED FORMULA J-16 DRIVEWAY SEALER extends pavement service life and makes pavements easier to clean. This unique, premium quality formulation lets you do it yourself with no costly mixing equipment. Easy-to-follow application directions are printed on every container.

Coverage: Quantities required will vary with porosity and texture of pavement surface, but general ranges are as follows:

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE

LASTEK® 400 DIRECT FIRE

CONTRACTOR GRADE

HOT APPLIED JOINT AND CRACKFILLER

2-25# BLOCKS PER CTN

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE
3L400DF	50 lb. Cartons	50 lbs.	.80¢/lb.

Lastek 400 DF (Direct Fire) is a single component joint and crack sealant specifically designed for use with a Direct Fired, single walled Melter. Lastek 400 DF is manufactured using select engineered asphalt cements, polymers, select oil resins and UV inhibitors. Lastek 400 DF will not flow from the joint or be picked up by vehicle tires, foot traffic, skateboards or roller blade wheels in high surface temperatures.

Lastek 400 DF was designed for the routine maintenance of asphalt concrete pavements or Portland Cement Concrete on driveways, parking lots, bicycle paths and walkways.

Melting Equipment: Lastek 400 DF was designed to be melted in a direct fire Melter equipped with either a hand operated or mechanically operated agitator or in a Oil Jacketed Melter with an agitator. The kettle should have a thermometer for the melting vat.

Coverage: Lastek 400 DF weighs approximately 9.5lbs./gal (1.14 kg/L). A joint ½" x ½" (12.7mm x 12.7mm) required approximately 12 lbs. Per 100 lineal feet or 17.7 kgs per 100 lineal meters.

Packaging: 2x25 lb. (1-1.33kg) polybags in a high-strength corrugated cardboard container.

Application Temperatures: Recommended pouring temperature 365°F.

MACSEAL BDM

HOT APPLIED JOINT AND CRACK SEALER FOR USE IN OIL JACKET MELTER 2-25LB. BLOCKS PER CONTAINER

MACSEAL BDM CRACK SEALANT is recommended for the large scale sealing of joints and random cracks in in portland cement concrete and asphalt pavements. It will provide good protection against repeated freeze thaw cycles.

MACSEAL BDM CRACK SEALANT is a premium quality, high performance hot applied, single component joint and crack sealant.

MACSEAL BDM CRACK SEALANT offers advanced low temperature bonding properties, prolonged resistance to degradation from weather and a positive seal during the expansion and contraction of the joint or crack. It remains ductile and highly resilient at low and high service temperatures.

CRACK SEALING

LASTEK® 33

RUBBERIZED LIQUID CRACK SEALER

- Elastic, ready-to-use sealer - just pour it in
- Dries fast
- Provides years of protection

LASTEK 33 is a one (1) component, pourable, high performance, black, rubberized asphalt emulsion-based crack sealer. It is ideal for filling cracks up to 1/2" wide in any asphalt or concrete surface.

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE
3L335	5 Gal. Plastic Pail	48 lbs.	\$56.00/pail
3L331	1 Gal. Plastic Jug	10 lbs.	16.25/jug

FOR CRACKS UP TO 1/2" WIDE

Coverage: 1 gallon fills 200-225 linear feet of 1/4"x 1/4" cracks.

Application: Clean dust, dirt, or loose material from the cracks. Fill with LASTEK 33. Squeegee off any excess flush with the surface. Cracks over 1/2" deep should first be partially filled with sand or backer rod Broadcast dry sand over freshly sealed cracks. Caution: Do not apply below 50°F. Do not use when rain is imminent. Do not use in cracks over 1/2" wide. (For cracks over 1/2" wide, use LASTEK CP-3405 CRACK SEALANT - SEE BELOW.)

LASTEK® HYFLEX

Our new Lastek HyFlex is a fast setting, ready to use , high performance cold pourable crack sealer. Ideal for use on all asphalt or concrete surfaces.

- Fast setting, Self leveling
- Ready to use, Easy pour jug
- For use on cracks up to 1/2" wide

Application: Mix Lastek HyFlex until a smooth consistency is achieved. Pour Lastek HyFlex into cracks to surface level, squeegee off any excess material. Lastek HyFlex is a cold applied elastomeric liquid crack sealant.

Coverage: Typical coverage is 200-225 linear feet per gallon, 1/4"x 1/4" x 1/4" crack

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE
3LHFLEX5	5 Gal. Pail	50 lbs.	\$56.00/pail
3LHFLEX1	1 Gal. Jug	10 lbs.	16.25/jug

READY-TO-USE

FAST DRYING

CRACK SEALANT

HyFlex is available in 1 gallon, 5 gallon, and 55-gallon containers.

HyFlex Coverage Rate:

One gallon of HyFlex will seal approximately 75 linear feet of 1/2" wide x 1/2" deep cracks. Ultimately, coverage is dependant upon depth and width of cracks.

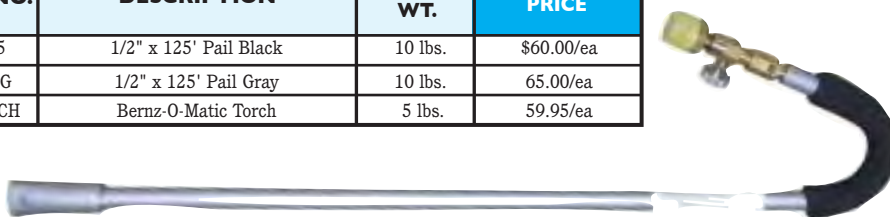

CRACK•RITE™ CRACK•STIX

**DIRECT HEAT RUBBERIZED
CRACK & JOINT SEALANT
FOR ASPHALT OR CONCRETE**

- No melters or pour pots needed
- Easy-to-use, professional results
- No tracking
- Traffic ready in 20 minutes

Uncoil, cut to length, pack and heat with propane torch and your crack repairs are complete.

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE
8CS125	1/2" x 125' Pail Black	10 lbs.	\$60.00/ea
8CS125G	1/2" x 125' Pail Gray	10 lbs.	65.00/ea
8CSTORCH	Bernz-O-Matic Torch	5 lbs.	59.95/ea

CSX900 TORCH

**For use with
CRACK•STIX**

*The high-output
outdoor torch with
a variety of uses*

- Repairing asphalt and tar
- Removing road markings

A rugged outdoor torch featuring a comfort grip handle, ergonomically balanced. Can comfortably operate continuously for an hour on a 14.1 oz. propane cylinder. (Propane Cylinder Not Included.)

Quik-Joint

**RUBBERIZED NON-TRACKING JOINT AND
CRACK SEALING TAPE FOR ASPHALT OR**

- Permanently seals by overbanding
- Easy to use – Just peel-stick-heat
- Expands and contracts with pavement
- Maintains uniform width
- Color: Black Thickness: 3/32" (.093")±
- Convenient 50-ft. rolls available in 3 width sizes – 1", 2", or 4"

Single Rolls Available

Remove release paper.

Place over joint.

Apply heat to melt and bond.

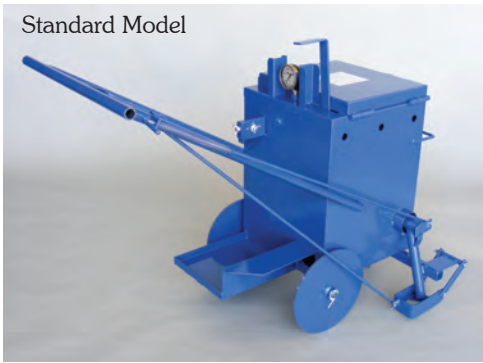

Application: Pavement must be clean, dry and free of dust. Pavement temperature should be above 40°F (pavement may be dried or surface temperature raised by first applying heat). Remove release liner, position Quik-Joint over the pavement joint/crack, and apply heat using a continuous motion with a propane torch until melting occurs.

NOTE: Quik-Joint is designed to seal joints. It is not designed to bridge large cracks. By fabricating the Quik-Joint tape to make a rope like caulk and applying heat in order to flow the material into the opening large cracks may be filled. Fill crack to surface level with the fabricated material, then proceed to overband the joint.

QUIK-JOINT is an innovative roll-out cold-applied strip sealant that creates a durable, watertight and elastic seal after being heat-bonded to the pavement surface. Its specially-blended, high-tack rubberized asphalt compound is compatible with all common pavement surfaces. Equal or better in quality, appearance, and durability to regular hot-applied sealers at a fraction of the cost. Quick and easy to apply by only one person. Saves time and money by eliminating the expense and manpower associated with hot tar kettles and related paraphernalia.

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE

THE MA10 MELTER/APPLICATOR

Standard Model

Length 47", Height 36", Width 27"

Up to 600 lbs. of sealant can be melted and applied per day by ONE (1) MAN with the MA-10 ...enough to seal 6400 linear feet of 1/2" X 1/2" cracks.

Suggested L-400 Rubber

A fast and efficient method for applying hot pour crack/joint sealant. Direct fire type sealant materials can be MELTED AND APPLIED by one (1) man. Or, use it to apply hot material from other larger melting equipment. Both models are mounted on steel wheels, and come equipped with hand agitators, spring loaded hand controlled release valves, steel screed for striking off the applied sealant in a neat uniform width, a burner assembly with hose and regulator, and temperature gauge, and a platform for propane bottles (propane bottle not included).

RY2X2-IR

RynoWorx Infrared Asphalt Heaters will bring distressed asphalt back to life. Infrared technology allows you to heat up and soften damaged areas so that they can be re-worked and compacted to appear brand new. In as little as 5 to 10 minutes this heater will have the asphalt brought to its original mixing temperature, allowing for effective and cost-effecient repairs. You'll now be able to spend minimal time repairing potholes, bird baths, cracks, and surface imperfections on both new and used asphalt.

THE "ORIGINAL" GATOR-PATCH™

- Designed especially for “Alligator Cracked” asphalt
- Less costly than hot mix skin patching

GATOR-PATCH is a ready-to-use blend of asphalt emulsion, mineral fillers, glass fiber, ground rubber and plasticizer. It is very durable for parking lots, driveways, playgrounds, walkways, running tracks, tennis courts, etc. In addition to alligator cracked areas, it can also be used to fill shallow depressions or to fill cracks in excess of 1/2” wide in asphalt surfaces.

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE
3GAP5	5 Gal. Pail	57 lbs.	\$58.00/pail

Coverage: Approximately 20-50 sq. ft. per gallon at 1/4” depth. Approximately 150 linear feet per gallon for cracks 1/2” x 1/2”.

Note: Temperature must be at least 50°F and rising during application and for at least 24 hours after application. Do not apply if rain is imminent or forecast for the next 24 hours.

Application: Mix, pour on, and work in with squeegees. Prime old, oxidized surfaces with Oxi-Bond cut with water (1 part Oxi-Bond and 2 parts water).

Fill depressions over 1/4” deep in multiple applications of no more than 1/4” at a time, allowing each coat to dry thoroughly.

MINCO® CONCRETE FASS-PATCH

HIGH PERFORMANCE,
POLYMER MODIFIED,
ONE-PART CONCRETE PATCH

- Easy 1 part mix. Just add water
- Initial set in as little as 12 minutes
- Excellent freeze thaw resistance
- Excellent adhesion
- Excellent resistance to de-icers
- Open to foot traffic in as little as 2 hours
- Use for vertical, horizontal and overhead repairs

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE
8MFP10	10 lb. Plastic Pail	16 lbs.	\$14.00/pail

POTHOLE PATCH

Application: Apply and compact with vehicle tire or tamper.

Coverage: 10 lbs. covers 1 sq. ft. at 1” depth.

OXI-BOND™

LATEX PRIMER CONCENTRATE

- To improve bonding of pavement sealers

A highly efficient easy-to-use primer for exposed aggregate or polished asphalt, old porous or oxidized surfaces, oil spots, or fresh hot mix patches. OXI-BOND PRIMER improves the performance and longevity of all pavement sealers applied over it. Make OXI-BOND PRIMER an itemized part of your bids and proposals to enhance your image, improve your jobs, and increase your profit.

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE
30X5	5 Gal. Pail	48 lbs.	\$65.00/pail

Application: Dilute 50/50 with water. Apply by spray, brush, or roller.

Coverage: 180-360 sq. ft. per gallon of diluted material (.025-.05 gallon per sq. yd.)

Drying Time: 30-60 minutes for subsequent sealcoating.

TACK COTE

For paving, patching, with
asphalt - promotes adhesion

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE
	5 Gal. Pail	44 lbs.	\$45.00

MINCO® OIL SPOT SEALER CONCENTRATE

- Prevents oil spot “bleeding”
- Super-concentrated, quick-drying formula saves money
- Water-based latex for ease of application and cleanup

MINCO OIL SPOT SEALER is a unique blend of copolymers and surfactants formulated in concentrate form for diluting with water prior to application. It grabs and seals oil and grease spots on asphalt surfaces to prevent “bleeding” into the cured film of pavement sealer. Prevents disbonding from the oil spot and will not allow the sealer to peel away from primed areas.

Application: Brush, roller or spray. One (1) gallon concentrate makes three (3) gallons of ready-to-use sealer/primer.

NOTE: MINCO OIL SPOT SEALER should be used over sound pavement only. If the area is so saturated that the asphalt is soft or crumbly, it should be dug out and patched with POTHOLE PATCH.

Coverage: 150-200 sq. ft. per gallon of concentrate. Drying Time: 20-30 minutes.

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE
30SS5	5 Gal. Pail	48 lbs.	\$90.00/pail

FASS-STRIPE

100% ACRYLIC TRAFFIC MARKING PAINT
MEETS FED. SPEC. TT-P-1952b and TT-P-1952d

A high-performance 100% acrylic latex paint designed for professional results. Ideal for parking lots, tennis courts, walkways, curbing, etc. Formulated for non-bleeding results over freshly sealed surfaces. Add that bright finishing touch with FASS-STRIPE Paint.

Application: Brush, roller or spray.

Colors Available: White, Yellow, Handicap Blue

Coverage: 325 ft. of 4-inch line at 15 mils wet thickness

- Bright, vibrant colors
- Quick Drying
- Durable & Long Lasting
- Environmentally Friendly
100% Acrylic Water-based Formula

POLYETHYLENE

STENCILS

FOR UNIVERSAL MARKING

- Save time and money
- Easy to clean
- Easy to transport

OVERNIGHT DELIVERY available on all in stock standard stencils

Precision cut out of a superior grade polyethylene material, these professional quality stencils make clean, sharp, and accurate pavement markings easy. Our top grade 1/8" thick (125 mil) stencils will stand up to the most rigorous day-to-day use by contractors. For economy-minded limited use needs, our 1/16" thick (60 mil) stencils will still perform well. Easy maintenance is the result of the smooth non-stick surface. Just flex and peel away dried paint.

All our character stencils are a standard GOTHIC BLOCK style/font, but we are also capable of producing letters, numbers, or words in different styles or fonts by special order (contact us for pricing). All wording stencils from 24" to 96" in height are designed around D.O.T. specifications and are designed to be read at a 22 degree angle.

LINE STRIPING & MARKING

WORDING STENCILS

All of our characters are a standard GOTHIC BLOCK style/font, but we are also capable of producing letters, numbers or words in over 130 different styles/fonts or other languages, if necessary. All styles/fonts are generated and stored on computer files for future recall and production. All wording stencils from 24" to 42" in height are designed around DOT specifications and meant to be read at 22°.

Prices per wording up to 4, 5, 8, and 10 letters — any word available.

EZ GRIP LIGHTWEIGHT SPRAY WAND

THE ULTIMATE SPRAY WAND FOR SEALCOATING

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE
8LWSW	EZ Grip Lightweight Spray Wand	8 lbs.	\$98.00/ea
8SWQD	3/4" Spray Wand Quick Disconnect		\$25.00

The "Original" Able Edger

- 14 gauge lightweight aluminum shield for cutting in edges with no overspray
- Flexible rubber squeegee for uniform edging and smoothing overspray
- A real time saver
- One man operation

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE
80AE	EDGER	14 lbs.	\$194.00
80AEB	Able Edger Blades Set of 2	3 lbs.	\$12.00/set

The Edger, a light weight aluminum shield, designed to reduce your cut-in time, is easily attached to a spray wand. Once attached, spraying along curbs, buildings, and fencing is quickly done and the texture of the sealcoating material is uniform at the edges as well as the center of the job.

The Edger is one of the most time saving tools ever introduced to the sealcoating industry. It will pay for itself in less than 10,000 linear feet of edging in time saved.

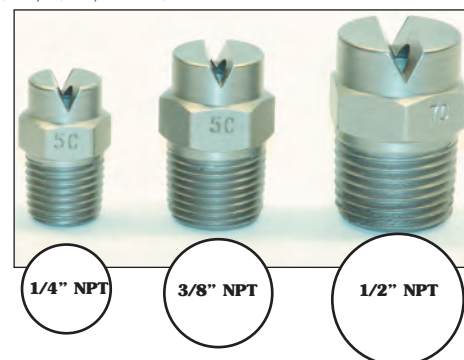

HARDENED STEEL SPRAY TIPS

Precision machined to the closest tolerances in the industry. The orifice is checked with a pin gauge. Free of nicks and burrs that can affect spray patterns. They are hardened to 60-65 Rockwell. Available thread sizes are 1/4", 3/8", and 1/2". Available orifice sizes are 80/20 (1/4" only), 80/30, 80/40, 80/50, 80/70, and 80/100. (80-degree fan spray)

PART NO.	DESCRIPTION	CONTRACTOR PRICE
8STA-L	1/4" Hardened Steel Tip (Specify Size: 80/20; 80/30; 80/40; 80/50; 80/70; 80/100)	\$3.75

PART NO.	DESCRIPTION	CONTRACTOR PRICE
8LWSW/A	3/4" Ball Valve	\$35.00

THE “GOLIATH”
ASPHALT LUTE
It’s all in the bracing

The “Goliath” lute has no competition...the strongest and most durable lute on the market. When a **superior wrap-around brace** is combined with the “original” **gusseted handle-to-head connection**... when a special recipe of aluminum and magnesium is extruded in thicker walls and head widths of 30", 36", and 42". When the handles are 82" of powder-coated aluminum **and now 1-3/8" in diameter**...well, you’ve got a lute for those who make their living using one... and it’s all American made, too.

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE
8GAL30	30" Goliath Lute w/82" Handle	6 lbs.	\$77.94/ea.
8GAL36	36" Goliath Lute w/82" Handle	6 lbs.	74.38/ea.
8GAL42	42" Goliath Lute w/82" Handle	6 lbs.	80.35/ea.
8AL82H	82" Replacement Handle	2 lbs.	30.00

ASPHALT SHOVELS

Here’s the true “asphalt” shovel. Not a full size scoop and not a traditional shovel - just the perfect combination of the two. Once called “coal shovels”, these have 16-gauge oversized steel heads with “scoop-like” side edges to prevent the loss of material. More controllable than a full-sized scoop. Both come with hardwood handles in either a 36" D-handle style, or a 42" long handled style. Traditionally called Asphalt Shovels, but if you are also moving stone, dirt, mulch, or snow...these just may be the perfect size and style. Buy by the 6-pack bundle and save.

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE
8AS1	Shovel w/ 36" D Handle	6 lbs.	\$39.00
8AS2	Shovel w/ 42" D Handle	6 lbs.	35.00

FELT ASPHALT

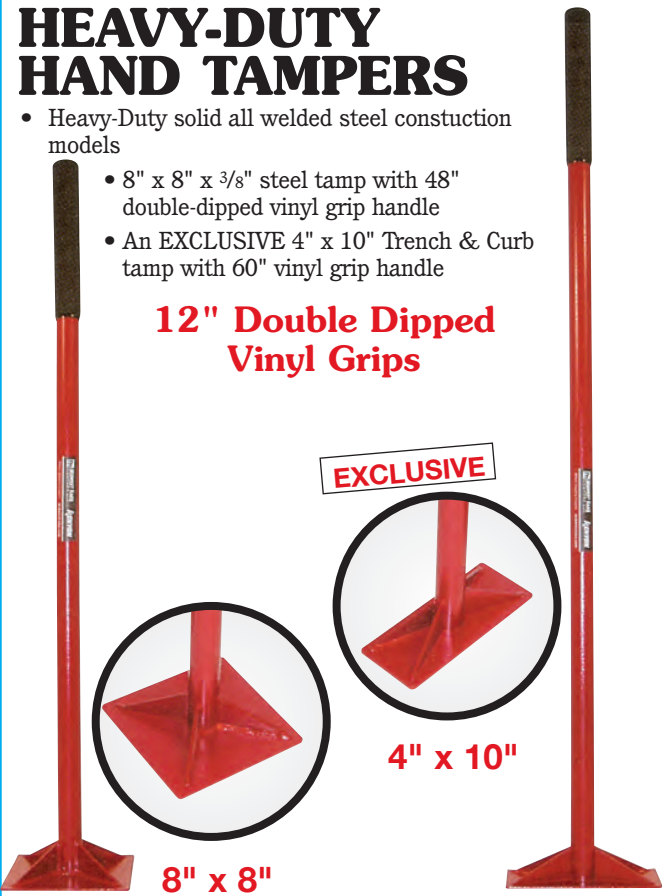

Tamp and compact where power and hand rollers can’t reach. Made with heavy gauge galvanized steel and a durable custom-blended extra-thick felt sole for long wear and clean, neat foot compaction. A no-hassle quick-release strap system allows quick in-and-out use.

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE
8FAS	Felt Asphalt Shoes	4 lbs.	\$66.00/pair

HEAVY-DUTY
HAND TAMPERS

- Heavy-Duty solid all welded steel construction models
- 8" x 8" x 3/8" steel tamp with 48" double-dipped vinyl grip handle
- An EXCLUSIVE 4" x 10" Trench & Curb tamp with 60" vinyl grip handle

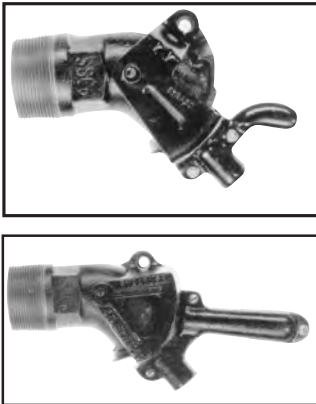

12" Double Dipped
Vinyl Grips

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE

PROFESSIONAL STREET BROOMS

CLEAN THE TOUGH STUFF OFF ASPHALT OR CONCRETE

AH-6 Aluminum Handle w/Adapter Kit
Shown With 8WB16 Steel Wire Broom

No. 8WB16 Steel Wire
Street Broom

Choose from two (2) popular styles. The 16" CARBON STEEL WIRE STREET BROOM is round carbon steel wire staple set in a smooth sanded hardwood block with two tapered handle holes. Wide flare on ends allows close sweeping next to building or curbing. Trim length 3-3/4". Order handle separately. The 16" PALMYRA Stalk Street Broom has a full 6-1/4" trim length fill of very coarse stiff long-lasting material that can tackle the heaviest buildups with ease. Wide flare ends allows close sweeping to curbs or buildings. Two tapered handle holes. Order handle separately.

PALMYRA STALK is a very coarse fill material having the appearance of split bamboo. This stiff long-lasting material is used almost exclusively in street brooms for contractors and public works departments.

Tired of broken broom handles?

You need Aluminum Handle with Adapter Kit for Street Brooms. Easily attaches to broom block. Can be used over and over. Could be the last handle you'll ever buy for street brooms. Kit includes 1-1/4" x 6" powder-coated yellow aluminum handle, with mounting base and hardware.

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE
8WB16	16" Carbon Steel Wire Street Broom	4 lbs. each 20 lbs. case of 6	\$29.00/ea. 174.00/(6)
8PS16	16" Palmyra Stalk, Street Broom	4 lbs. each 19 lbs. case of 6	31.00/ea. 184.00/(6)
8HNDL5TE	5' Tapered End Wood Handle for Street Broom	2 lbs.	6.00/ea.

OIL-FLO™ CLEANER AND DE-GREASER

OIL-FLO SAFETY SOLVENT is such a versatile, effective cleaner, you'll wonder how you got along without it. Very economical and easy to apply, it contains no chlorinated hydrocarbons and comes ready to use. It is non-foaming with slow evaporation. Remove tar or asphalt from just about anything. Remove grease and oil from concrete. Dissolve gasoline or hydraulic oil spills. Clean exhaust soot off vehicles. Remove old decals and stickers. Clean safety cones of oil, tire marks, asphalt, etc.

Application: Spray it on using the handy trigger spray bottle. Work it in or agitate with a brush. Rinse with cold water. Excellent for use on concrete, wood, metal, painted surfaces, glass, masonry, carpet, fabrics.

- Amazing "Sealer Cleaner" for removing tar and asphalt
- Water soluble, non-caustic

PART NO.	DESCRIPTION	SHIPPING WT.	CONTRACTOR PRICE

8LWCCWW	9" Repl. Wire Wheel	4 lbs.	\$59.95/ea.

- **Adjustable front wheels** — Allow brush to stay down and keep clearing on uneven surfaces
- **Dual belt drive** — Provides added power and more grip to minimize slippage
- **Convenient belt release lever** — Enables unit to idle without added belt wear
- **Red Brush** — For edger
- **Long lasting wire wheel** — Heavy duty 9" wire wheel ensures professional, quality crack cleaning
- **Four-wheel design** — Provides extra stability and eliminates the need for a curb wheel. All wheels have steel hubs with ball bearings and full axles for smooth and easy maneuverability.

PLASTIC PARKING STOPS
(WHEEL STOPS)

The perfect low-cost alternative to concrete wheel stops. Molded of high-impact recycled thermoplastic for superior strength and durability. Easy to install with rebar fasteners. Easy to maintain — never damaged by road salts, won't chip, crack, or deteriorate from weather. Never needs painting. Protective profile design prevents front end baffle damage on today's lower built cars. CHOICE OF COLORS: Yellow or Blue.

Easy Rider Rubber Speed Bumps

100% Recycled rubber speed bumps are ideal for speed control on parking lots, driveways, etc. Will not warp, crack, chip, or rot. Black in color with high visibility yellow polyurethane glass beaded paint with built in reflectors for added safety. Install on asphalt with 14" capped rebar spikes.

Park-It Rubber Parking Stops

100% Recycled rubber parking stops ideal for effective delineation of parking or protection of walls in parking lots or garages. Black in color with high visibility yellow polyurethane glass beaded paint. Install on asphalt with 14" capped rebar spikes.

COLOR COAT

Description:

REC-TECH Color Coat is an attractive, non-fading color coating for asphalt and concrete sport surfaces. Formulated with 100% acrylic resins, it provides a durable, weather-resistant finish with beautiful color and uniform texture. This coating remains flexible and provides predictable ball bounce, a cooler, non-glare surface, and is easy to clean.

COLOR COAT is designed for onsite mixing with silica sand and water.

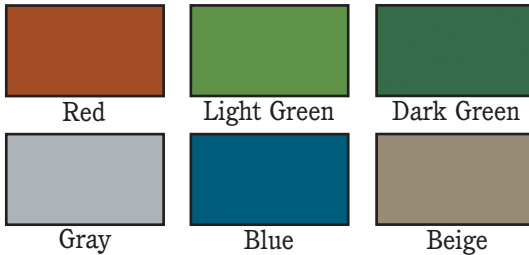

Coverage:

Coverage is approximately .05 to .07 gallons per square yard, per coat. Coverage is based on undiluted gallons of Color Coat and will vary according to the porosity and texture of the surface.

Mixing Directions

Color Coat 55 Gallons
Water 28-33 Gallons
Silica Sand 400 Lbs. (70-90 Mesh AFS)

Available Colors:

*These printed colors may vary from actual product colors.

NOTE:

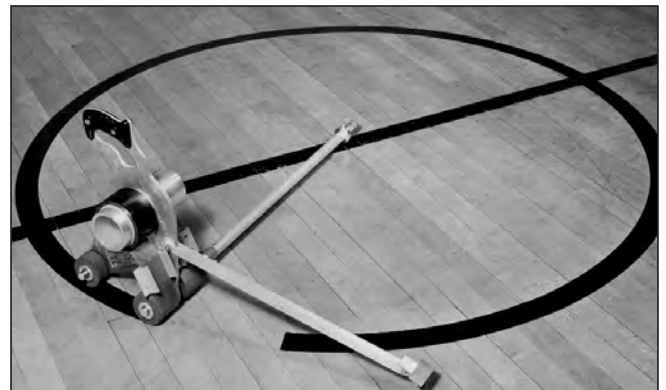

Temperature must be at least 50°F and rising during application and for at least 24 hours after application. Do not apply if rain is imminent or forecast for the next 24 hours.

ACRYLIC RESURFACER

Description:

REC-TECH Acrylic Resurfacer, applied to asphalt or concrete surfaces, fills surface voids and imperfections and helps provide a smooth, well prepared surface. This 100% acrylic emulsion is designed for onsite mixing with silica sand and water.

Coverage:

Coverage is approximately .07 to .09 gallons per square yard, per coat. Coverage is based on undiluted gallons of Acrylic Resurfacer and will vary according to the porosity and texture of the surface.

Mixing Directions

Patching Materials - For Use on Lifts up to 1/4"

Acrylic Resurfacer	10 Gallons
Water	5 Gallons
Sand	200 Lbs. (30-40 Mesh AFS)
Cement	1/2 Gallon

(Combine Cement and a small amount of Water before adding to Patching Material Mix)

Coating Material Use

Acrylic Resurfacer	55 Gallons
Water	33 Gallons
Sand	800 Lbs. (50-70 Mesh AFS)

NOTE:

Temperature must be at least 50°F and rising during application and for at least 24 hours after application. Do not apply if rain is imminent or forecast for the next 24 hours.

ACRYLIC BINDER

Description:

REC-TECH Acrylic Binder is a 100% acrylic emulsion designed to be mixed with sand and portland cement. Patch mixes based on Acrylic Binder are designed for filling low spots up to 1/2" deep.

Mixing & Coverage:

Acrylic Binder 4 gals. • Sand 100 lbs. • Cement 15-25 lbs. • Water up to .75 gals. Mix all material together prior to adding Rec-Tech Acrylic Binder. 1 gallon will yield approximately 1 square yard or 9 square feet at 1/4" depth.

Mixing Directions

A drill with mixing attachment is preferred, although, material may be mixed by hand.

Silica Sand	100 Lbs.
Portland Cement	30 Lbs.

Mix dry sand and dry cement first. Then, continue to add:

Acrylic Patch Binder	3 1/2 Gallons
Water	1/2 Gallon

Mix ingredients for 2-4 minutes. DO NOT OVER MIX.

NOTE:

Temperature must be at least 50°F and rising during application and for at least 24 hours after application. Do not apply if rain is imminent or forecast for the next 24 hours.

8AHYDM	Hydraulic Motor	\$358.00
8AHMB	Hydraulic Motor Bracket	\$75.00
8AHHOSE	Hydraulic Hose – per foot	Call
8GX200	200 CC – Pull Start	Call
8GX270	270 CC – Pull Start	Call
8GX270E	270 CC – Electric Start	Call
8GX390E	390 CC – Electric Start	Call

Air Compressors & Parts

PART NO.	DESCRIPTION	PRICE
8A13HPC	13 HP Rol-Air Compressor, 30 gal	Call
8APS9	9 HP Rol-Air Compressor, 30 gal	Call
8A9HPC	9 HP Rol-Air Pro Spray Compressor, 9 gal	Call
8A6HPC	6.5 HP Rol-Air Pro Spray Compressor, 9 gal	Call
8ARUV	Rol-Air Unloader Valve	\$109.00
8AEMUV	Emglo Unloader Valve	\$55.00
8ARCO	Compressor Oil, Quart	\$15.00
8ABOX	Battery Box	\$85.00

Troubleshooting Guide

Symptom:	Potential Cause(s)	Recommendation(s):
Pump Cycles Once	Deadhead (system pressure meets or exceeds air supply pressure).	Increase the inlet air pressure to the pump. Pump is designed for 1:1 pressure ratio at zero flow. (Does not apply to high pressure 2:1 units)
	Air valve or intermediate gaskets installed incorrectly.	Install gaskets with holes properly aligned.
	Bent or missing actuator plunger.	Remove pilot valve and inspect actuator plungers.
Pump Will Not Operate/Cycle	Pump is over lubricated.	Set lubricator on lowest possible setting or remove. Units are designed for lube free operation.
	Lack of Air (line size, PSI, CFM).	Check the air line size and length, compressor capacity (HP vs. CFM required)
	Check air distribution system.	Disassemble and inspect main air distribution valve, pilot valve and pilot valve actuators.
	Discharge line is blocked or clogged manifolds.	Check for inadvertently closed discharge line valves. Clean discharge manifolds/piping.
	Deadhead (system pressure meets or exceeds air supply pressure).	Increase the inlet air pressure to the pump. Pump is designed for 1:1 pressure ratio at zero flow. (Does not apply to high pressure 2:1 units)
	Blocked air exhaust muffler.	Remove muffler screen, clean or de-ice, and re-install.
	Pumped fluid in air exhaust muffler.	Disassemble pump chambers. Inspect diaphragm rupture or loose diaphragm plate assembly.
	Pump Chamber is blocked.	Disassemble and inspect wetted chambers. Remove or flush any obstructions.
Pump Cycles and Will Not Prime or No Flow	Cavitation on suction side.	Check suction condition (move pump closer to product).
	Check valve obstructed. Valve ball(s) not seating properly or sticking.	Disassemble the wet end of the pump and manually dislodge obstruction in the check valve pocket. Clean out around valve ball cage and valve seat area. Replace valve ball or valve seat if damaged. Use heavier valve ball material.
	Valve ball(s) missing (pushed into chamber or manifold).	Worn valve ball or valve seat. Worn fingers in valve ball cage (replace part). Check Chemical Resistance Guide for compatability.
	Valve ball(s) / seat(s) damaged or attacked by product.	Check Chemical Resistance Guide for compatability.
	Check valve and/or seat is worn or needs adjusting.	Inspect check valves and seats for wear and proper setting. Replace if necessary.
	Suction line is blocked.	Remove or flush obstruction. Check and clear all suction screens or strainers.
	Excessive suction lift.	For lifts exceeding 20' of liquid, filling the chambers with liquid will prime the pump in most cases.
	Suction side air leakage or air in product.	Visually inspect all suction-side gaskets and pipe connections.
	Pumped fluid in air exhaust muffler.	Disassemble pump chambers. Inspect for diaphragm rupture or loose diaphragm plate assembly.
Pump Cycles Running Sluggish/Stalling Flow Unsatisfactory	Over lubrication.	Set lubricator on lowest possible setting or remove. Units are designed for lube free operation.
	Icing.	Remover muffler screen, de-ice, and re-install. Install a point of use air drier.
	Clogged manifolds.	Clean manifolds to allow proper air flow.
	Deadhead (system pressure meets or exceeds air supply pressure).	Increase the inlet air pressure to the pump. Pump is designed for 1:1 pressure ratio at zero flow. (Does not apply to high pressure 2:1 units)
	Cavitation on suction side.	Check suction (move pump closer to product).
	Lack of air. (line size, PSI, CFM).	Check the air line size, length, compressor capacity.
	Excessive suction lift.	For lifts exceeding 20' of liquid, filling the chambers with liquid will prime the pump in most cases.
	Air supply pressure or volume exceeds system hd.	Decrease inlet air (press. and col.) to the pump. Pump is cavitating the fluid by fast cycling.
	Undersized suction line.	Meet or exceed pump connections.
	Restrictive or undersized air line.	Install a larger air line and connection.
	Suction side air leakage or air in product.	Visually inspect all suction-side gaskets and pipe connections.
	Suction line is blocked.	Remove flush obstruction. Check and clear all suction screens or strainers.
	Pumped fluid in air exhaust muffler.	Disassemble pump chambers. Inspect for diaphragm rupture or loose diaphragm plate assembly.
	Check valve obstructed.	Disassemble the wet end of the pump and manually dislodge obstruction in the check valve pocket.
	Check valve and/or seat is worn or needs adjusting.	Inspect check valves and seats for wear and proper setting. Replace if necessary.
	Entrained air or vapor lock in chamber(s).	Purge chambers through tapped chamber vent plugs. Purging the chambers of air can be dangerous.
Product Leaking Through Exhaust	Diaphragm failure, or diaphragm plates loose.	Replace diaphragms, check for damage and ensure diaphragm plates are tight.
	Diaphragm stretched around center hole or bolt holes.	Check for excessive inlet pressure or air pressure. Consult Chemical Resistance Chart for compatability with products, cleaners, temperature limitations and lubrication.
Premature Diaphragm Failure	Cavitation.	Enlarge pipe diameter on suction side of pump.
	Excessive flooded suction pressure.	Move pump closer to product. Raise pump/place pump on top of tank to reduce inlet pressure. Install Back pressure device (Tech bulletin 411r). Add accumulation tank or pulsation dampener.
	Misapplication (chemical/physical incompatibility).	Consult Chemical Resistance Chart for compatibility with products, cleaners, temperature limitations and lubrication.
	Incorrect diaphragm plates or plates on backwards, installed incorrectly or worn.	Check Operating Manual to check for correct part and installation. Ensure outer plates have not been worn to a sharp edge.
Unbalanced Cycling	Excessive suction lift.	For lifts exceeding 20' of liquid, filling the chambers with liquid will prime the pump in most cases.
	Undersized suction line.	Meet or exceed pump connections.
	Pumped fluid in air exhaust muffler.	Disassemble pump chambers. Inspect for diaphragm rupture or loose diaphragm plate assembly.
	Suction side air leakage or air in product.	Visually inspect all suction-side gaskets and pipe connections.
	Check valve obstructed.	Disassemble the wet end of the pump and manually dislodge obstruction in the check valve pocket.
	Check Valve and/or seat is worn or needs adjusting.	Inspect check valves and seats for wear and proper setting. Replace if necessary.
	Entrained air or vapor lock in chamber(s).	Purge chambers through tapped chamber vent plugs.

Maintenance, Inc.....Over 80 years and still going strong

ORDERING INFORMATION

PAYMENT TERMS: Our terms are Net 30 Days to rated firms (subject to late payment charge of 1-1/2% per month). If you are not a rated firm, but wish to establish 30-day credit, we will need one (1) bank reference and three (3) trade references with addresses, phone numbers, and fax numbers. Visit www.maintinc.com to get an application for credit form.

PRICES: Effective March 1, 2022 All prices are subject to change without notice.

STATE AND LOCAL SALES TAX: Any applicable sales tax will be added to the order, unless you furnish us with an exemption certificate.

TRANSPORTATION TERMS: All prices are F.O.B. Shipping Point.

LOSS OR DAMAGE: The carrier is responsible for any losses or damages sustained in transit. Claims should be made promptly against the carrier. Be sure any shortages or damages are noted on the carrier's delivery receipt and initialed by the driver. We will gladly assist you in securing adjustment.

RETURNS: No returns will be accepted without our written approval. Credit for such authorized returns (subject to condition of material) will be issued at the original purchase price less a 25% restocking and handling charge. An additional charge of 10% per month will be made on products having a limited shelf life. Transportation charges will be for the account of the customer.
